Why Polygons are Mostly Pointless

John Christensen
Jeremy Jorgensen
Gus Hart

Brigham Young University

Table of Contents

1. Background
   - Lattices
   - Brillouin Zones
   - Symmetry

2. Irreducible Brillouin Zone Algorithm
   - Why we have to work in the Brillouin Zone
   - Finding the Irreducible Brillouin Zone
   - Results

- Our Goal: Predict the properties of materials

- Our Goal: Predict the properties of materials
- The Problem: Simulating a mole of atoms is impossible
